Address: Hungary, 2851 Környe, Tópart str. 1. • Tel/fax: +36 34 473 888 • Cell: +36 30 927 3259 • E-mail: femex@t-online.hu

About our company

Company and its predecessors since 1995, deals with tools manufacturing. At that time, we rented a shop in the Tatabánya's waterworks, where there are only 2 cutting machine made our machine park. In 1998, due to an increase in Our machine park we moved to one of the Donat Banki Technical High School's workshop. In 2000, for new machines expansion and population growth we moved our company to present site, what initially hired, but four years later could we purchase it.

In 12 years the number of our machines are more than six-fold increased! Now in 2012, our machines are more than twenty, which include lathes and milling machines (CNC-controlled, conventional), grinders (skirt, flat), band saw, horizontal, and wire EDM machines and blocks can be found.

Our services:

- tool design • tooling • repairing
- parts manufacturing
- surface treatment • metal working

Our strong point is the quick, accurate and reliable work. As a result, that we can be establish and maintain a direct, continuous connection with our partners, and clients. Our stable expansion due to relations and orders. We ensure our competitiveness with modernized main building (in 2004), new machines and measuring equipments. Thanks to improved capacity and productivity, result a continuous and significant increase was achieved in our business.

Range of services

Our main activity is the Tooling. In addition to the activities we also deal with design, manufacture and repair of any individual machine components and parts. As we want to satisfy customers' needs, sometimes try to solve problems either new design of tools or through subcontractors.
